DIGITAL LITERARCY

CSE0001

31 March 2026

PROJECT REPORT

SWAGATIKA PRIYADARSHINI SAHOO
REGISTRATION NUMBER: 25BSA10002
BRANCH: BTECH- CSE (CLOUD COMPUTING AND AUTOMATION) 2025 BATCH

Introduction

In today's digital world, having basic digital skills is not just useful but essential. This project was completed as part of the Digital Literacy course, where I took on the role of a Student Digital Ambassador. The main aim of this assignment was to understand how to use digital tools effectively, communicate professionally online, and stay safe from cyber threats.

The project included five different tasks, each focusing on a specific area such as creating an infographic, building a digital portfolio, exploring coding platforms, writing professional emails, and understanding cybercrime. Through this project, I got practical experience with various tools and platforms, and it helped me become more confident in using digital technologies in an organized and responsible way.

Task 1: Digital Literacy Infographic

For this task, I created a digital literacy infographic using Canva. The aim was to explain what digital literacy means and why it is important for students. In the infographic, I included topics like safe internet practices, useful digital tools for students, and maintaining a professional online presence.

While designing the infographic, I focused on keeping it simple, visually appealing, and easy to understand. I used icons, colours, and short points so that anyone viewing it can quickly grasp the information. Canva made the design process easier with its templates, but choosing the right layout and organizing the content properly was slightly challenging.

This task was interesting because it showed me how important visual communication is. I learned how to present information in a way that is not only informative but also engaging. It improved my creativity and helped me understand how design plays a role in spreading awareness.

Task 2: Student Digital Portfolio

For this task, I created a digital literacy infographic using Canva. The aim was to explain what digital literacy means and why it is important for students. In the infographic, I included topics like safe internet practices, useful digital tools for students, and maintaining a professional online presence.

While designing the infographic, I focused on keeping it simple, visually appealing, and easy to understand. I used icons, colours, and short points so that anyone viewing it can quickly grasp the information. Canva made the design process easier with its templates, but choosing the right layout and organizing the content properly was slightly challenging.

This task was interesting because it showed me how important visual communication is. I learned how to present information in a way that is not only informative but also engaging. It improved my creativity and helped me understand how design plays a role in spreading awareness.

Task 3: Coding and Collaboration Platforms

For this task, I explored both coding and collaboration platforms. I used HackerRank to solve a beginner-level problem, which helped me understand how coding challenges work. It also improved my logical thinking and problem-solving skills.

In addition to that, I created a Digital Literacy Awareness Quiz using Google Forms. The quiz included five questions related to digital safety and awareness. I also learned how to view responses using Google Sheets, which was quite interesting.

This task helped me understand how these platforms can be used in academics. Coding platforms like HackerRank are useful for improving programming skills, while tools like Google Forms can be used for surveys, quizzes, and collecting data. Overall, this task was practical and helped me learn tools that I can use in my studies.

Task 4: Email Etiquette and Social Media Checklist

A common example of poor digital communication is when a student sends an email without a proper subject line or uses an informal tone while writing to a professor. This can create confusion and may even result in the message being ignored.

Professional emails should always be clear, polite, and well-structured. During this task, I learned how to write emails properly, including adding a subject line, greeting, main content, and a respectful closing. Small things like tone and clarity can make a big difference.

This task helped me understand the importance of professional communication, especially in academic and work environments.

Task 5: Cybercrime Awareness

While working on the cybercrime task, I was surprised to see how common phishing scams have become. Many of these scams look very real, which makes it easy for people to fall for them without realizing.

This made me more aware of the importance of being careful online. One habit I will change is checking links and messages more carefully before clicking on them or sharing any personal information.

This task helped me understand how serious cyber threats can be and why it is important to stay alert while using the internet.

Conclusion

While working on the cybercrime task, I was surprised to see how common phishing scams have become. Many of these scams look very real, which makes it easy for people to fall for them without realizing.

This made me more aware of the importance of being careful online. One habit I will change is checking links and messages more carefully before clicking on them or sharing any personal information.

This task helped me understand how serious cyber threats can be and why it is important to stay alert while using the internet.
